IP44

230 Volt

**Width 183mm x Height 160mm Depth
132mm**

Similar Output To 150/200 Watt

RoHS 

Our new range of '**Energy Saving**' LED Floodlights are ideal for lighting up drive ways and access areas. The lamps will work trouble free for up to 20,000 hours which is far longer than a standard halogen lamp that typically only last from one to two thousand hours depending on the quality. The PIR version covers 120 Degrees and is adjustable from 5 to 12 meters.

If your customer doesn't want to change the existing halogen fitting then why not offer your customer our NEW 25w Halogen Lamp replacement lamp.
