

POP UP (TOWER) SOCKETS

SIDE VIEW

Welcome to our Pop Up (Tower) Sockets. If this concept is new to you let me explain. An 80mm hole is drilled into the kitchen unit or office work station and the 'Pop Up Socket' is fitted in the hole. The pre-installed 2 metre trailing cable is then plugged, out of site, under the unit to provide power to this appliance. Finished in an attractive black & satin chrome.

FEATURES
